
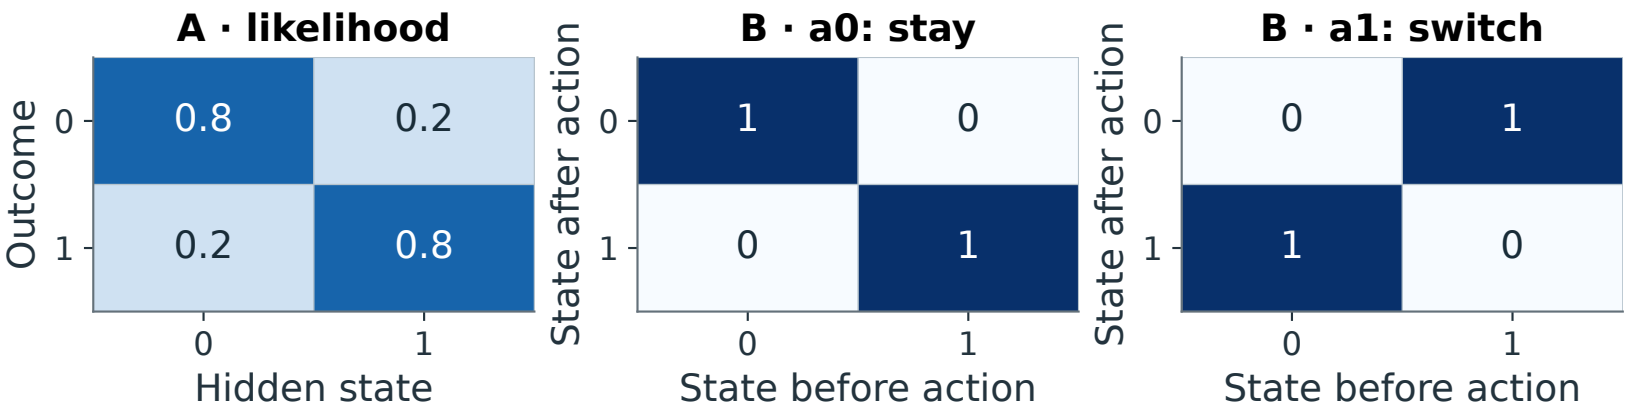
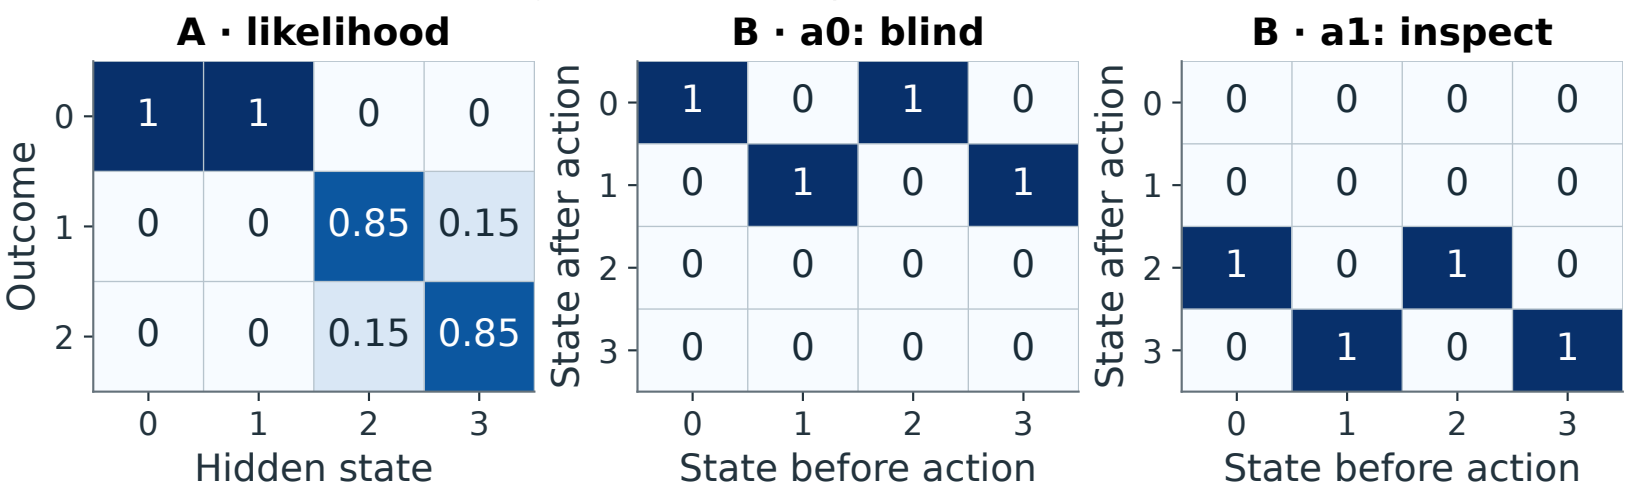
Binary sensor · one action

C logits = [0, 0] D probabilities = [0.5, 0.5]



Stay / switch · two actions

C logits = [1, -1] D probabilities = [0.5, 0.5]



Active sensing · two actions

C logits = [0.15, 0, 0] D probabilities = [0.5, 0.5, 0, 0]

Matrices show probabilities from 0 (white) to 1 (dark blue).
The binary sensor's single B slice is repeated; C is not a probability.
